TECHNICAL DATA SHEET HIP AND RIDGE SHINGLES

SILHOUETTE HIP & RIDGE

DESCRIPTION:

SILHOUETTE is a superior Hip and Ridge manufactured using SBS modified bitumen for increased durability and flexibility. It is backed by the same warranty that applies to the BP shingles or the BP roofing system applied to the roof.

These multi-layered preformed shingles will add tridimensional depth to any roof line. The uniform colour pattern **SILHOUETTE** Hip and Ridge yields even more curb appeal when used in combination with one of our recommended BP Canada laminate shingles.

FEATURES:

SILHOUETTE's adjustable design eliminates the need of cutting the shingles that will serve for hip and ridge. Simply remove unit from the box and place on ridge as is. Then follow the application instructions of the product

STORAGE:

Do not double-stack pallets. Material must remain dry. If stored outside material must be doubled bagged and stored above standing water.

PHYSICAL PROPERTIES

Average coverage per box	6,1 li.m. (20 li. ft)
Dimensions	292 mm x 254 mm (11 1/2" x 10")
Exposure	20.32 cm (8")
Pieces / Box	30
Boxes / Pallet	42

APPLICABLES STANDARDS

Meets ASTM D3462
Meets CAN/CSA 123.5
UL 790 & CAN/ULC S107 & ASTM E108, Fire Resistance Class A;
Wind resistance ASTM D3161 Class F
UL Listing R14379
