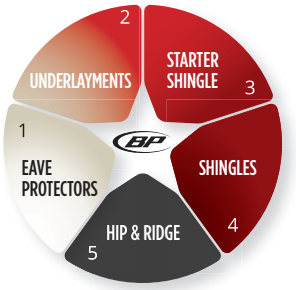
Weather-Tite® ROOFING SYSTEM

The Weather-Tite® Roofing System is engineered to maximize protection in rough weather. To ensure optimum effectiveness, a roof must be installed according to BP's application instructions and respect the **5 KEY STEPS OF THE WEATHER-TITE® ROOFING SYSTEM:**

BP's COMPLETE WEATHER-TITE® ROOFING SYSTEM

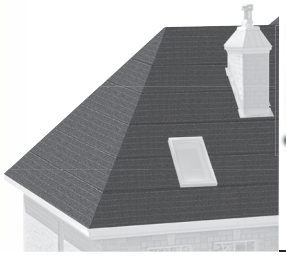


1 BP EAVE PROTECTORS

Considerable eave damage can be caused by ice build-up during winter freeze/thaw cycles. **Gripgard** and **Weathertex®** waterproofing membranes provide protection against such damage.

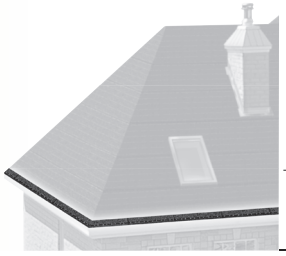
2 BP UNDERLAYMENTS

High-performance **BP Prodeck**, **BP lined asphalt felt**, **BP Suredeck**, and **BP Deckgard** provide top-notch secondary protection from water driven under the shingles by high winds.

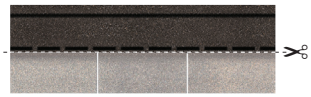


3 BP STARTER SHINGLES

Cost-effective **Cut-off Classic 3-Tab Shingles** and **BP Starter Strips** reduce installation time and waste by eliminating shingle scraps while providing excellent protection against wind and water infiltration.



BP Starter Strips



BP Classic Cut-Off 3-Tab Shingles

4 BP SHINGLES

Weather-Tite® TECHNOLOGY WITH 2 SEALANT BANDS

BP shingles provide maximum protection where it matters most. Our **Classic 3-Tab Shingles** deliver proven performance, long-term durability, and a wide range of colours. Our **Premium Architectural Shingles** are available in a rich selection of designer shades. Moreover, all BP architectural shingles feature Weather-Tite® Technology's two bands of high-tack adhesive.
